## Kianna D. BS, NASM-CPT

Growing up, Kianna participated in athletics such as soccer and basketball, but it wasn't until she discovered weightlifting that she fully developed a passion for health and fitness. Upon learning the benefits of working out and seeing how it improves one's well-being, she quickly realized that helping others accomplish their fitness goals was the career path for her. While in college, She prepared for and competed in three bodybuilding competitions through the National Physique Committee (NPC) and placed among the top 5 in each show.

In both gym and physical therapy settings, Kianna has experience working with men and women of diverse needs, ranging from 13 to 95 years old. This has given her the freedom to work with clients from both ends of the fitness spectrum: from just a few weeks post-op to those on a mission to deadlift 315 pounds. Whether your goal is post-rehab recovery, weight loss, or muscle growth, Kianna has the knowledge and experience to help you achieve your goal.

Kianna holds a Bachelor of Science degree in Exercise and Sport Physiology from Plymouth State University and is certified through the National Academy of Sports Medicine (NASM).
